

Aneri Bhavsar - Knowledge Base

Q: Tell me about yourself.

A: I am Aneri Bhavsar, a B.Tech Computer Science graduate from Ganpat University with a CGPA of 8.59 and a strong focus on AI, Machine Learning, Computer Vision, RAG, and Generative AI.

Q: Where did you complete your schooling?

A: I completed both my 10th and 12th standard from Kendriya Vidyalaya.

Q: What was your 10th percentage?

A: I scored 85% in my 10th standard.

Q: What was your 12th percentage?

A: I scored 88% in my 12th standard.

Q: Which college did you attend?

A: I completed my B.Tech in Computer Science from Ganpat University.

Q: What is your CGPA?

A: My CGPA is 8.59.

Q: When did you graduate?

A: I completed my B.Tech in 2025.

Q: What is your current designation?

A: I am currently working as an AI/MLEngineer.

Q: Where do you currently work?

A: I work at Maharshi Industries Pvt. Ltd.

Q: Since when have you been working there?

A: I joined Maharshi Industries in June 2025.

Q: What is your notice period?

A: My notice period is 1 month.

Q: Are you actively looking for opportunities?

A: Yes, I am open to exploring suitable AI and Machine Learning opportunities.

Q: Are you open to relocation

A: Yes, I am open to relocation

Q: Are you open to remote work?

A: Yes, I am open to remote, hybrid, and onsite roles.

Q: What programming languages do you know?

A: My primary programming languages are Python and SQL.

Q: What AI technologies have you worked with?

A: I have worked with PyTorch, TensorFlow, LLMs, VLMs, LangChain, LangGraph, RAG, and Computer Vision frameworks.

Q: What is your strongest skill?

A: My strongest skills are Computer Vision, Deep Learning, and Generative AI application development.

Q: Do you have experience with LLMs?

A: Yes, I have hands-on experience with LLMs, VLMs, RAG systems, LangChain, LangGraph, Qwen, Gemma, Ollama, and vLLM.

Q: What is RAG?

A: RAG stands for Retrieval-Augmented Generation, which combines information retrieval with language models to generate accurate responses.

Q: Have you built chatbots?

A: Yes, I built Ask ANERI, an AI-powered health and skincare chatbot using RAG and LangChain.

Q: Tell me about Ask ANERI.

A: It is an AI-powered chatbot that answers questions related to skincare, acne, PCOS, hormonal health, and women's wellness using a custom knowledge base.

Q: What databases have you worked with?

A: I have worked with ChromaDB and SQL databases.

Q: Do you have cloud experience?

A: Yes, I have AWS Cloud Foundations certification and practical exposure to AWS tools.

Q: What is your experience in Computer Vision?

A: I have worked on object detection, segmentation, facial recognition, ANPR, thermal imaging, and surveillance analytics from last 2 years

Q: What is DivyaChakshu AI?

A: It is a surveillance platform involving object detection, facial recognition, ANPR, and multi-camera analytics using RGB and thermal cameras.

Q: What is ANPR?

A: ANPR stands for Automatic Number Plate Recognition, a system that automatically identifies vehicle registration numbers from images or videos.

Q: What quality inspection projects have you worked on?

A: I developed AI-powered quality inspection systems using RF-DETR, PyTorch, OpenCV, and Vision Language Models.

Q: Have you worked with Vision Language Models?

A: Yes, I have used models such as Qwen and Gemma in industrial AI applications.

Q: Tell me about the Color Change Detection project.

A: It is an AI system developed for DRDE Gwalior that automates chemical resistance testing through color analysis and robotic integration.

Q: Have you worked with object detection?

A: Yes, extensively using YOLO models and RF-DETR.

Q: Which YOLO versions have you used?

A: I have worked with YOLOv8 and YOLOv11.

Q: What was your internship experience?

A: I worked as a Data Science Intern at BISAG-N from January 2025 to April 2025.

Q: What did you do at BISAG-N?

A: I developed geospatial AI solutions using satellite imagery, object detection, and image segmentation.

Q: What is your experience with satellite imagery?

A: I built rooftop detection systems using deep learning models and geospatial analysis tools.

Q: Which segmentation models have you used?

A: I have worked with DeepLabV3+ and U-Net.

Q: Which tools do you use for geospatial analysis?

A: I have used QGIS, ArcGIS, SNAP, and OpenCV.

Q: How do you evaluate AI models?

A: I use metrics such as Accuracy, Precision, Recall, IoU, and mAP.

Q: Have you worked with PyTorch?

A: Yes, PyTorch is one of my primary frameworks for deep learning development.

Q: Have you worked with TensorFlow?

A: Yes, I have used TensorFlow for computer vision and deep learning projects.

Q: What certifications do you have?

A: I have AWS Cloud Practitioner, AWS Academy Cloud Foundations, Deep Learning Specialization, and Generative AI/LangChain certifications.

Q: Do you have experience deploying AI solutions?

A: Yes, I have worked on deploying real-world AI solutions for industrial and defense-related applications.

Q: What kind of roles are you targeting?

A: AI Engineer, Machine Learning Engineer, Computer Vision Engineer, GenAI Engineer, and Applied AI roles.

Q: Why should we hire you?

A: I combine strong academic fundamentals with practical industry experience in AI, Computer Vision, and Generative AI.

Q: What are your career goals?

A: I want to build impactful AI products and become an expert in applied AI and intelligent systems with the automation Chatbots and the computer vision part.

Q: How do you stay updated with AI trends?

A: I continuously learn through research papers, courses, industry blogs, and hands-on experimentation.

Q: What is your expected salary?

A: My salary expectations are flexible and depend on the role, responsibilities, and overall compensation package.

Q: Can you work in a team environment?

A: Yes, I enjoy collaborating with cross-functional teams and stakeholders.

Q: What are your strengths?

A: Problem-solving, fast learning, AI development, and building production-focused solutions.

Q: What are your hobbies?

A: I enjoy learning new technologies, exploring AI research, and building side projects.

Q: When can you join?

A: I can join after serving my 1-month notice period.

Q: Do you have any questions for us?

A: I would like to know more about the team, project roadmap, growth opportunities, and expectations for the role
